Volume 12, 1988

Number 1/2

Robert M. McKillip Jr	1	Kinematic observers for active control of helicopter rotor vibration
C. W. Acree Jr and Robert M. Kufeld	13	In-flight measurement of rotor hub drag using the RSRA—a feasibility demonstration
Fu Changqing and Wang Shicun	27	Aeroelastic stability of rotor blades by lifting surface theory and finite element method
Ki-Chung Kim, Gunjit Singh Bir and Inderjit Chopra	39	Helicopter response to an airplane's vortex wake
J. M. Drees	55	Expanding tilt rotor capabilities
Ernest O. Rogers, Alan W. Schwartz and Jane S. Abramson	69	Applied aerodynamics of circulation control airfoils and rotors
Wayne Johnson	83	Time-domain unsteady aerodynamics of rotors with complex wake configurations
G. Alvin Pierce and Steven S. Klein	101	A unique approach to aeroelastic testing of scaled rotors
Richard L. Bielawa and Keng D. Hsueh	109	Design strategies for the development of a model helicopter rotor impedance test facility
H. E. Jones and F. X. Caradonna	129	Full potential modeling of blade–vortex interactions
L. Morino and B. K. Bharadvaj	147	A unified approach for potential and viscous free-wake analysis of helicopter rotors
D. Menaker and A. Rosen	155	A model for helicopter performance calculations
A. Graber and A. Rosen	179	A parametric investigation of a free wake analysis of hovering rotors
	i	Guidelines for the preparation of typescripts for direct reproduction

Number 3

G. D. Padfield, M. T. Charlton, S. S. Houston, H-J. Pausder and D. Hummes	197	Observations of pilot control strategy in low level helicopter flying tasks
G. H. Gaonkar and D. A. Peters	213	Review of dynamic inflow modeling for rotorcraft flight dynamics
Dewey H. Hodges, Marcelo R. M. Crespo da Silva and David A. Peters	243	Nonlinear effects in the static and dynamic behavior of beams and rotor blades
Thomas F. Brooks	257	Effect of signal jitter on the spectrum of rotor impulsive noise

D. W. Hurst and S. J. Newman 267 Wind tunnel measurements of ship induced turbulence and the prediction of helicopter rotor blade response

E. Krämer, J. Hertel and S. Wagner 279 Computation of subsonic and transonic helicopter rotor flow using Euler equations

W. R. Walker and C. Hatch 293 Pitch-flap flutter instability of a swept-tip model rotor blade

C. L. Chen, W. J. McCroskey and S. X. Ying 303 Euler solution of multiblade rotor flow

i Announcement

iii Guidelines for the preparation of typescripts for direct reproduction

Number 4

Francis X. Caradonna, Roger C. Strawn and John O. Bridgeman 315 An experimental and computational study of rotor–vortex interactions

Robert McKillip Jr 329 Experimental studies in system identification of helicopter rotor dynamics

Donald L. Kunz and Dewey H. Hodges 337 Analytical modeling of helicopter static and dynamic induced velocity in GRASP

A. Desopper, P. Lafon, J. J. Philippe and J. Prieur 345 Effect of an anhedral sweptback tip on the performance of a helicopter rotor

G. T. S. Done, P. T. W. Juggins and M. H. Patel 357 Further experience with a new approach to helicopter aeroelasticity

John D. Berry and Daniel Schrage 371 Rotor design for maneuver performance

H. C. Curtiss Jr 381 Stability and control modelling

i Guidelines for the preparation of manuscripts for direct reproduction
